Functionalities

4 step colour temperature adjustment: 2700K, 3000K, 4000K and 5700K

CCT

Increase the colour temperature
Eg: If the configured colour temperature is 3000K, pressing the button, the next colour temperature will be 4000K.

Decrease the colour temperature
Eg: If the configured colour temperature is 4000K, pressing the button, the next colour temperature will be 3000K.

Intensity adjustment with the following levels: off, 20% of maximum brightness, 50% of maximum brightness and 100%.

Increase brightness
Eg: If the configured intensity level is at 20%, pressing the button, the intensity will increase to 50%.

Decrease brightness
Eg: If the configured intensity level is at 100%, pressing the button, the intensity will decrease to 50%.

Save configuration

Pressing this button, the colour temperature and intensity levels are saved.
The bar flicks, indicating that the settings have been saved.

How to use

1,5 m
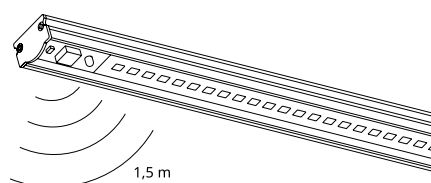

Control should be made at a maximum distance of 1,5 m between the IR remote and the CCT controller placed inside the bar.
